

Global Edge® 2017 – Document Interface

The Power to Succeed in a Global Market

Global Edge® 2017 – Document Interface provides a simplified method to automatically manage and analyze CAD documents and sheet metal parts for the purposes of quoting and routing generation. This includes simple one click technology that generates the sheet metal part parameters required to generate accurate sales quotes and routings. **Global Edge** includes document vaulting, and document check-in / check-out capabilities that provides an organized system for simplifying your quoting, engineering and manufacturing workflow process.

Automatically Manage and Analyze Your CAD Documents

Key Features

- Vaulting and Tracking of Windows compatible documents
- Document Check-In / Check-Out
- One-click analysis of sheet metal part parameters
- Automatic sheet metal part parameter calculations
- Automatically determines laser cut time
- Automatically determines machine tool operation time
- Import engineering parameters into quoting process
- Export results to Excel file

Key Benefits

- ✓ Eliminates manual analysis of sheet metal parts
- ✓ Provides accurate information for quoting
- ✓ Provides parameters for machine tool / routing selection
- ✓ Increase capacity / accelerates quoting process
- ✓ Helps determine most cost effective method to fabricate sheet metal parts
- ✓ Helps ensure accurate sales quotes and profitable projects

Increase Engineering Productivity!

"Global Edge allows engineering to control the product which has dramatically increased the efficiency of the engineering and manufacturing departments."

Andrew Johnsen, Electrical Engineer
Lambda Electronics, Inc. – Melville, New York
