

Global Edge® 2017 – SolidWorks Interface

The Power to Succeed in a Global Market

Global Edge® 2017 – SolidWorks Interface provides a simplified method to automatically export your 3D SolidWorks CAD Models into DXF files that are prepared for your manufacturing systems. **Global Edge** will drill through your assembly CAD Models and automatically identify sheet metal components. This includes the generation and export of flatten DXF files that are oriented properly for your nesting software and machine tools. **Global Edge** can also export SAT files that are properly oriented for your bending machine tools.

Try it Free for 30 Days

Try the **Global Edge® 2017 – SolidWorks Interface** free for 30 days to discover how your company can accelerate your engineering process by reducing the amount of time it takes to generate information for the shop floor.

Key Features

- Automatic Drill Down of Sheet Metal Parts from Assembly
- Automatic Generation and Export of DXF Files
- Automatic Bending Orientation of 3D SAT Model Files

Key Benefits

- ✓ Eliminates manual generation of DXF files
- ✓ Automates orientation of CAD files for bending machines
- ✓ Speeds up manufacturing engineering process
